

FEROZOMAL
microgranules for direct use
food supplement with sweeteners
with lemon and forest fruit flavor

with liposomal iron and vitamins C and B₁₂

FEROZOMAL is a food supplement in the form of sachets with microgranules for direct use, with a pleasant taste of lemon and forest fruit.

Insufficiency of iron can occur due to increased loss of iron, malabsorption, increased needs of iron due to insufficient intake through food.

Sachets **FEROZOMAL** contain iron (iron pyrophosphate) in the form of a liposomal complex.

The iron is surrounded by a phospholipid bilayer (liposome) and it doesn't come into direct contact with the mucous membrane of the digestive tract. This ensures high bioavailability and good tolerance of iron without leaving a metal taste in the mouth.

INGREDIENTS IN THE RECOMMENDED DAILY DOSE

	1 sachet (1,8 g)	RDA * (%)
Iron	30 mg	214
Vitamin C	80 mg	100
